## Index

Dear teacher,
From all the Richmond team we'd like to transmit our hope that this Teacher's Resource Book helps you and your students make the most of the Wonder 3 project. You will find the following areas inside, each containing worksheets, their corresponding answer key and where appropriate, the audio transcript. They are designed to cover all the possible needs, queries or difficulties your students may have.

## Language:

The worksheets for this section focus on the new vocabulary and structures presented. To help with the diversity in your class we have provided these at two levels: consolidation and extension. Consolidation worksheets reflect the general level of the class. They provide students with additional material for extra practice, while extension worksheets are for students who require more challenging material.

## Skills:

This section is divided into the four main areas of language acquisition: reading, writing, listening and speaking. You will find a variety of exercises that while focusing on a particular skill, continue to practise the vocabulary and structures covered in each unit. You will find this section particularly useful if you are preparing your students for the Young Learners exams.

## Phonics:

These worksheets are designed to provide extra practice for the initial sounds presented in lessons 6 and 7 of the Student Book.

## Tests:

You will find four types of tests: a general diagnostic test, unit, term, and end-of year tests. This format allows you to choose the most appropriate time to gauge the level of your students' understanding and assimilation of new language. All the tests are intended to be fun, but thorough. They include work on the four basic skills and, as in the Language worksheets, include two different levels of the same unit content to meet the needs of all your students.
Don't forget that you also have the option of creating and adapting your own tests for the class in the activity generator supplied with the teacher's resource material.

Warm wishes,
The Richmond Editorial Team
